1 About this document

This guide will introduce you to the steps needed to publish apps, sheets and stories to make content available to other users.

Make sure to see the Concepts in Qlik Sense guide to learn more about the publishing concept.

This document is derived from the online help for Qlik Sense. It is intended for those who want to read parts of the help offline or print pages easily, and does not include any additional information compared with the online help.

Please use the online help or the other documents to learn more.

The following documents are available:

- Concepts in Qlik Sense
- Working with Apps
- Creating Visualizations
- Discovering and Analyzing
- Loading and Modeling Data
- Data Storytelling
- Script Syntax and Chart Functions Guide
- Qlik Sense Desktop

You find these documents and much more at help.qlik.com.

2 Publishing apps, sheets and stories

Apps including sheets and stories can be published to make content available to other users. Additional sheets and stories can be published as a part of an app that is already published. Access rights control which users are allowed to publish different kinds of content.

Apps are published using the Qlik Management Console.

2.1 Unpublished app

What you can do

- Edit the load script and reload the data.
- View the data structure and details about the data from the data model viewer.
- Create, edit, and delete sheets, visualizations, and bookmarks.
- Create master items (dimensions, measures, and visualizations) for reuse.
- Navigate between sheets, stories, and bookmarks.
- Make and clear selections.
- Apply/recall bookmarks.

2.2 Published app

What you can do

- Navigate between sheets.
- Explore sheets and visualizations that were included in the app from the beginning.
- View stories that were included in the app from the beginning.
- Create and edit your own private sheets, visualizations and stories based on the data in the app.
- Publish sheets and stories that you have created so that others can use them.
- Unpublish sheets and stories that you have published so that they become private again.
- Copy and paste visualizations between sheets.
- Use master items (dimensions, measures and visualizations) that were included in the app from the beginning.
- Create and edit your own private bookmarks.
- Make and clear selections.
- Apply/recall bookmarks.

What you cannot do

- Edit the load script or reload the data.
- Access the data model viewer.

- Edit visualizations, sheets, stories and bookmarks that were included in the app from the beginning.
- Edit sheets and stories that have been published.

3 Publishing a sheet

You can publish sheets that you have created, so that other users can view them.

You can only publish sheets as a part of an app that is already published.

Do the following:

1. From the app overview, click to view the sheets.
2. Long-touch/right-click the sheet you want to publish and select **Publish**.
   The **Publish sheet** dialog appears.
3. Click **Publish**.

The sheet is published and moved from **My sheets** to **Published by me**.

Other users, with access to the same app, will find the published sheet in their **Community** section.

*You can also publish a sheet in the sheet view by clicking and selecting **Publish sheet**, or by long-touching/right-clicking a sheet in the sheet navigator.*

4 Unpublishing a sheet

You can revert a sheet that you have published to being unavailable to others by unpublishing it.

Do the following:

1. From the app overview, click to view the sheets.
2. Find the published sheet under **Published by me**.
3. Long-touch/right-click the sheet and select **Unpublish**.
   The **Unpublish sheet** dialog appears.
4. Click **Unpublish**.
   The sheet is unpublished and moved from **Published by** me to **My sheets**.

The sheet is no longer available to other users of the app.

*You can also unpublish a sheet in the sheet view by clicking and selecting **Unpublish sheet**, or by long-touching/right-clicking a sheet in the sheet navigator.*

5 Publishing a story

You can publish stories that you have created, so that other users can view them.

You can only publish stories as a part of an app that is already published.

Do the following:

1. From the app overview, click to view the stories.
2. Long-touch/right-click the story you want to publish and select **Publish**.
   The **Publish story** dialog appears.
3. Click **Publish**.

The story is published and moved from **My stories** to **Published by me**.

Other users, with access to the same app, will find the published story in their **Community** section.

*You can also publish a story in the storytelling view by clicking and selecting **Publish story**, or by long-touching/right-clicking a story in the story navigator.*

6 Unpublishing a story

You can revert a story that you have published to being unavailable to others by unpublishing it.

Do the following:

1. From the app overview, click to view the stories.
2. Find the published story under **Published by me**.
3. Right-click/long-touch the story and select **Unpublish**.
   The **Unpublish story** dialog appears.
4. Click **Unpublish**.
   The story is unpublished and moved from **Published by me** to **My stories**.

The story is no longer available to other users of the app.

*You can also unpublish a story in the storytelling view by clicking and selecting **Unpublish story**, or by long-touching/right-clicking a story in the story navigator.*
